Investment Objective

To maximise capital growth over the medium to long term with a focus on reducing capital volatility through a neutral asset allocation model. By investing equally across equities, property, bonds and alternative investment structures, with no allocation bets, this multi-managed fund gives excellent diversification.

Fund Manager Commentary

Investor confidence has improved significantly since late 2011, however, the outlook for growth remains challenging. The consensus expects the global economy to grow by 2.2% in 2012. This forecast is below trend & is lower than the International Monetary Fund's most recent forecast of 3.3%. Looking forward, we anticipate a gradual increase in the growth rate in several major economies. The Euro-zone debt crisis may be in remission but the consensus forecasts that GDP growth will fall by 0.4% this year. On balance, we consider that growth at the levels forecast will be insufficient to make much of a dent in excess capacity or to generate inflationary pressures. Equity markets drifted lower in early March, however, the latest & largest supply of liquidity to the financial system from the European Central Bank boosted investor confidence & helped global equity markets to rally into the month end. The MSCI World Index rose 1% for the month although the FTSE 100 fell, failing to hold on to gains as economic data disappointed at month end. Commodity prices also finished a little lower & gold failed to recover from last month's disappointment at the lack of additional quantitative easing in the US. Hedge fund performance was mixed & UK Government bonds retreated modestly in March as investors generally favoured risk assets.
